Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Persona: An end customer who reaches out to a company's support team to report a product/service issue or ask a question, and expects a quick, transparent resolution.

Example: Customer Care Registry Application

Pain

- No centralized tracking of issues
- Repeats issue on every contact
- Long wait times for a response
- Inconsistent answers across agents

Gain

- Quick, reliable resolution
- Transparent status updates
- Personalized, informed support
- Greater trust in the brand
