

Project Design Phase-II
Data Flow Diagram & User Stories

Date	11 July 2026
SID	SWUID2026230011
Project Name	Customer Care Registry (MERN Stack)
Maximum Marks	4 Marks

Data Flow Diagram (Level 0):

The Data Flow Diagram below represents how information moves through the Customer Care Registry system. It shows the three external entities — Customer, Support Agent, and Administrator — the core processes that handle registration, ticket logging, tracking, feedback and reporting, and the data stores where this information is persisted (MongoDB collections in the MERN stack).

Flow (step-by-step):

1. Customer registers/logs in with email and password; credentials are verified and stored in the Users store.
2. Customer raises a ticket describing the issue; the ticket is stored and Support Agent is alerted.
3. Support Agent updates the ticket status (Open / In-Progress / Resolved); the Customer is notified.
4. Once resolved, Customer submits feedback and a star rating, which is stored in the Feedback store.
5. Administrator requests analytics; the system aggregates ticket and feedback data into reports.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web / Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my name, email, password and confirming my password.	I can access my account / dashboard	High	Sprint-1
	Registration	USN-2	As a user, I will receive a confirmation email once I have registered for the application.	I receive the confirmation email and can click confirm	High	Sprint-1
	Registration	USN-3	As a user, I can register for the application through my Google account.	I can register & access the dashboard with Google login	Medium	Sprint-2
	Login	USN-4	As a user, I can log into the application by entering my email & password.	I can access the dashboard after valid login	High	Sprint-1
	Raise Ticket	USN-5	As a user, I can raise a new complaint/ticket by selecting a category, entering a description and attaching a file.	A ticket is created with a unique ID and status "Open"	High	Sprint-2
	Track Ticket	USN-6	As a user, I can view the current status of all tickets I have raised.	I can see status as Open / In-Progress / Resolved	High	Sprint-2
	Feedback	USN-7	As a user, I can submit feedback and a star rating once my ticket is resolved.	Feedback is stored and visible to admin/agent	Medium	Sprint-2
Support Agent	Agent Dashboard	USN-8	As a support agent, I can view a list of all tickets assigned to me, sorted by priority.	Assigned tickets appear with priority & SLA timer	High	Sprint-2
	Ticket Update	USN-9	As a support agent, I can update ticket status and add resolution notes.	Customer is notified automatically on status change	High	Sprint-2
Administrator	User Management	USN-10	As an admin, I can view and manage all registered customers and agents.	Admin can add, block or remove a user account	Medium	Sprint-3
	Reports & Analytics	USN-11	As an admin, I can view a dashboard with ticket volume, resolution time and agent performance.	Charts render with live/updated data	Medium	Sprint-3
	Escalation	USN-12	As an admin, tickets unresolved beyond the SLA period should auto-escalate.	Escalated ticket is flagged and re-assigned automatically	Low	Sprint-3
