

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	11 July 2026
Team ID	
Project Name	Customer Care Registry
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration & Login	Registration through Form Registration through Gmail (OAuth) Login with Email & Password
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Complaint / Ticket Management	Create a new complaint/ticket Attach files or screenshots to a ticket Categorize complaint by type/priority
FR-4	Ticket Tracking & Status Updates	View ticket status (Open / In-Progress / Resolved) Receive email/SMS notification on status change
FR-5	Customer Support Interaction	Live chat with a support agent Browse FAQ / knowledge base
FR-6	Admin Dashboard	View and manage all tickets Assign tickets to support agents View analytics on complaint trends
FR-7	Feedback & Rating	Submit feedback after ticket resolution Rate the support experience

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, intuitive interface for both customers and support agents; mobile-responsive design.
NFR-2	Security	JWT-based authentication, bcrypt password hashing, HTTPS, and role-based access control to protect customer data.
NFR-3	Reliability	Consistent ticket handling with minimal downtime and regular automated database backups.
NFR-4	Performance	Fast page loads (under 2 seconds) and efficient handling of concurrent users and ticket queries.
NFR-5	Availability	Target of 99.5% uptime through cloud hosting, health checks and monitoring.

NFR No.	Non-Functional Requirement	Description
NFR-6	Scalability	Horizontally scalable backend (stateless REST APIs, containerization) to support growing ticket volume and users.
